

Grade 5

Human Body

Chapter 5 Lesson 3

Page	Question	Answer(s)	Links/Sources
174	Why do you think the male reproductive organs are mostly found on the outside of the body.	Sample answer: Because the development of sperm requires a lower temperature than the body's internal temperature.	
174	Why do you think the female reproductive organs are mostly found on the inside of the body.	Sample answer: The baby needs to develop inside the mother's uterus so it can develop in a safe environment.	
177	How does this illustrate the miraculous plan God has for humankind?	Sample answer: Just like God placed eggs in a woman's body before she will ever use them. God also created a plan of salvation for use before we would ever need it?	
177	What do you think would happen if more than one egg were released?	There would be a possibility of more than one baby.	
178	Why do you think menstruation is referred to as a period?	Because it happens on a regular cycle or period. Also it comes from the Latin "periodus" meaning recurring cycle.	https://kidshealth.org/en/kids/menstruation.html
178	Can you think of other ways cramps can be relieved?	Heating pads, resting, taking pain medication.
